

HST America

No contracts to sign,
no equipment to buy,
no fees to sign up.

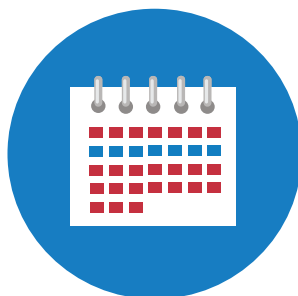

Concierge home sleep testing.

HST America specializes in diagnostic home sleep testing services for dentists. We have been working with sleep apnea patients for the last decade and are the only national testing program where units are hand-delivered and demonstrated.

In-person device
delivery and training

Turnaround times as
low as 7-10 days

Most patient insurance
plans accepted

Services provided at
no cost to dentist

How to refer patients for diagnostic home sleep testing.

1

Screen

Screen patients with the Pre-Appointment Questionnaire. Many practices provide the form to the patient while in the waiting room, then review during the appointment.

2

Order

Complete a Home Sleep Test Prescription and submit by email on referrals@hstamerica.com or by fax to (888) 461-5751. Please include a copy of the Pre-Appointment Questionnaire and both sides of the patient's medical insurance card.

You may also give the patient an Appointment Card as a reminder of when their results will be reviewed.

3

Insurance Verification & Scheduling

We verify the patient's insurance and make contact to discuss out of pocket costs, if any. Approved patients are scheduled for a two night home sleep test.

4

Testing

We hand-deliver the equipment and provide in-person training. We also maintain an overnight patient support line should additional assistance be required.

5

Results

After the patient has successfully completed the test, we retrieve the device and upload the data the same day. The data is then scored by a board-certified sleep physician and sent to the referring dentist.

The average turnaround time from referral to result is approximately 7-10 business days, assuming immediate patient availability.

The image shows three overlapping forms from HST America. The top form is the 'PRE-APPOINTMENT QUESTIONNAIRE' which includes patient information, a sleep apnea risk assessment with a scoring table, and a sleep history section. The middle form is the 'HOME SLEEP TEST PRESCRIPTION' which includes fields for patient demographics, insurance information, and a section for signs and symptoms. The bottom form is an 'APPOINTMENT CARD' which includes fields for practice address, phone, email, and website, along with a section for diagnosis and test ordered.
